SOLUTION DESIGNER

- Exciting transformation project
- Sydney, CBD
- Temporary contract

About the role

We are seeking a Solution Designer for a 24-month contract working on our Business Transformation team. The Solution Designer has technical oversight across all workstreams and will help define the strategic vision for the technology. Working closely with team members, you will evaluate the capabilities and requirements for all solutions. The role will also be required to consult with various vendors and stakeholders to develop an architectural roadmap and technology strategy that will define numerous platforms.

Duties

Your typical tasks and duties will include:

- examining and developing alternative technological solutions that are innovative and drive digital transformation;
- analysing and challenging assumptions and solutions in the current technological architecture;
- reducing the technical footprint across various platforms and exploiting new opportunities in the marketplace;
- driving and championing standardisation and seeking the reduction of complexity in technical design;
- translating the business requirements into viable technology solutions;
- analysing and monitoring market trends and directions;
- creating and maintaining technology roadmaps with changing requirements;
- the continuous development and configuration of solutions;
- creating software architectural diagrams that are simple and tailored for non-technical audiences and various stakeholders; and
- providing guidance and advice on technical choices to various stakeholders and vendors.

About you

The ideal candidate for this role will have:

- a degree in computer science or engineering or similar (highly regarded);
- relevant industry certifications such as AWS Architect or TOGAF (highly regarded);
- extensive experience in solution design and solution delivery on complex programs;
- practical experience working on AWS, including automation, configuration and design;

- a deep and extensive knowledge of Amazon Web Services and the various technology solutions it offers;
- a strong business acumen and a thorough understanding of different business models in the education, government and commercial sectors;
- an enthusiastic and collaborative work demeanor;
- a dedication to delivering exceptionally high levels of service;
- the ability to deliver innovative and creative solutions;
- a positive, pro-active attitude and will take full accountability over their work;
- demonstrated ability in prioritising workload to meet challenging project timelines;
- experience working on digital and cloud projects with solid agile practices adhering to lean principles;
- a detailed understanding of the architecture methods and patterns that can manage complex, integrated solutions;
- demonstrated experience designing transitional architectures through various phases from current to target state;
- extensive experience of the AWS platform including computer, storage, database and networking;
- the ability to design and document a Service Oriented Architecture (SOA) across different cloud platforms and services;
- proven experience with cloud migrations for software, platform and infrastructure as a service; and
- a good technical understanding of current and emerging technologies and how to employ these to drive digital strategy.

About us

The Copyright Agency is an Australian not-for-profit organisation that represents over 40,000 members across the publishing, media, visual arts, education and surveying sectors. We license copyright material so organisations can legally reuse content created by others, and be confident that creators are being compensated fairly for their work. We also manage the Resale Royalty Scheme for artists. The Copyright Agency's Cultural Fund provides grants to organisations and individuals to help enrich Australia's cultural life.
