▲ +21

of non-users expect to start using in the next 12 months

By end of Aug 2026,

70%

▲ +31

of Local Council employees expect to be using Gen AI for work

76%

▼ -5

using ChatGPT

50%

▲ +10

using Microsoft 365 Copilot

20%

▲ +7

using Gemini (Google)

42%

▲ +24

are using a paid version of a GenAI tool

Research was conducted in September 2024 and 2025 by Fiftyfive5, an independent market research agency, and consisted of a 10-minute online survey with over 200 Local Council employees who have used Generative AI tools for work purposes.

GenAI usage is becoming habitual, driving creativity and efficiency, and increasingly replacing traditional search

72%

believe GenAI tools have helped them be more creative and innovative at work

76%

▲ +11

believe GenAI tools have improved their efficiency at work

51%

often use GenAI tools instead of traditional search engines (such as Google) for work

39%

▲ +17

believe they would be negatively impacted if they lost the ability to use GenAI tools for work

How is GenAI being used at work?

63%

▲ +12

using weekly for text generation

16%

using weekly for generation of slides or presentations

16%

using weekly for image generation

Most common uses of GenAI for text...

58%

▲ +13

for creation of new text

75%

▲ +17

for refinement of internal text (written by self or colleagues)

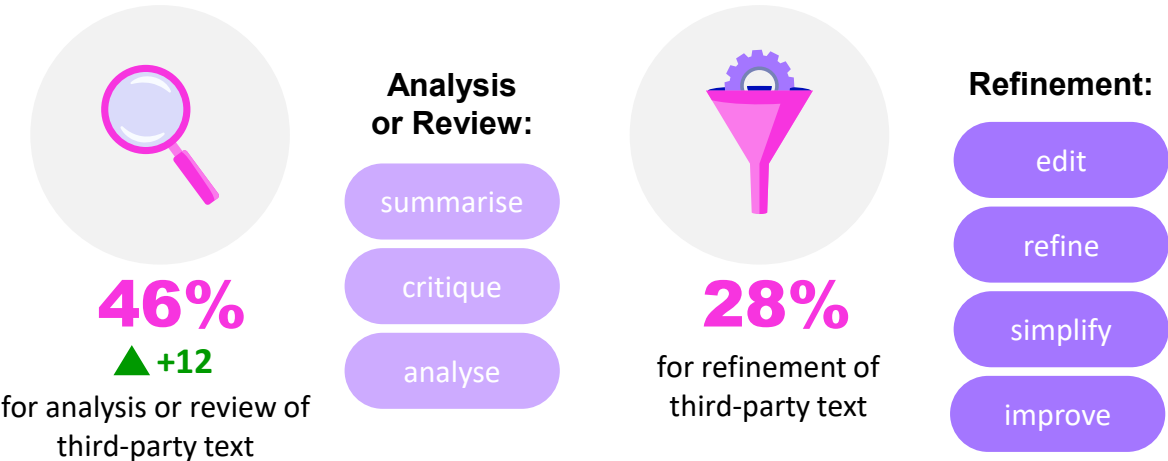

49%

for research/ background intel

How is third-party material being used in AI prompts?

Among those who have used AI for text-generation...

45% use third-party materials (i.e. published text & images) in AI prompts **weekly** and 21% do so **daily** ▲ +5

On a weekly basis, employees engage in multiple methods of third-party material inclusion

“I wanted to summarise a research paper to make it more understandable and quicker to digest, so I simply asked AI to summarise the content and to give a high-level overview before I actually dive in.”

Operations Manager

“Mainly my use is for organising the content - rather than producing the content. I have used GenAI to summarise media articles.”

Legal, Governance & Compliance Manager

“I used a destination website plus market research to generate a travel article for use on blog and EDM.”

Marketing & Communications Manager

As the use of Generative AI grows, so do the associated risks and governance concerns relating to copyright

Use of third-party materials in AI prompts

Sharing of AI outputs

'Shadow' usage of AI tools

Lack of understanding

Widespread use of third-party material

54%

▲ +11

have used GenAI for analysis, refinement or summarisation of third-party text at work

45%

copy-paste, upload, link, or reference third-party materials in AI prompts weekly

SHARING OF OUTPUTS

70%

are sharing outputs internally with colleagues

30%

are sharing outputs with people outside their local council

'SHADOW' USAGE

17%

use GenAI for work, even though their council doesn't encourage it

LACK OF COPYRIGHT UNDERSTANDING

Only **30%**

▲ +7

say they understand the copyright terms and conditions of the AI tools they use

GenAI has heightened employees' awareness and concern around copyright and expectations on councils to promote responsible use and ethical behaviour

76%

think about complying with copyright laws when using AI for work purposes

41%

▲+10

are concerned about including third-party material in prompts

67%

would have greater peace of mind if their organisation had a copyright licence that allowed use of third-party content in AI tools for work

24%

do not think about it at all

22%

are not sure if they should be

Staff do not feel adequately trained

Only

36%

▲+14

think their employer provides sufficient training opportunities about how to use GenAI for work

Does your local council have a GenAI policy? Does it cover ethical use and address the potential risks of copyright infringement?

49%

believe management
at their local council
encourages the use
of GenAI tools

Local councils
encourage the use
of GenAI but many
still don't have a
policy in place

...but only

What you need to know

01

Penetration has increased by 76% over the last year. The latest research reveals that 58% of employees use GenAI tools with 45% using third-party material in inputs or prompts at least weekly.

02

Most users (70%) don't understand the terms of use of these tools and licensing requirements around use of third-party material. This raises ethical concerns and increases the risk of copyright infringement.

03

Compliance and risk are key concerns cited by 85% of GenAI users. Only 39% believe their local council has clear policies around governance, use and risk management.

04

Copyright protects published text and images used by staff in local councils such as news and magazine articles, journal articles, industry reports and trade publications, including when used in GenAI tools.
